WEIHENSTEPHAN · TRIESDORF
University of Applied Sciences

Study Abroad Semester at Germany's Green University

International Bachelor Semester
Climate Change and Climate Adapation - B.Sc.

October 2026 – February 2027

Study abroad semester in Germany at
Weihenstephan-Triesdorf University of Applied Sciences (HSWT)

The **"Climate Change and Climate Adapation"** semester is a study opportunity for exchange students that takes place on our Weihenstephan campus in Freising. Classes are taught in English. The curriculum includes courses such as "Climate Change", "Meteorology and Climatology", "Foundations of Water Resources Management" as well as German and advanced English language classes.

Participation Requirements

- Enrollment in a relevant field of study (e.g. Landscape Architecture, Sustainable Agriculture & Energy Systems, Environmental Engineering, Agriculture, Forestry or other related fields) in a university outside of Germany
- Undergraduate students 2nd year or advanced
- Interest in environmental and climate change topics
- English language proficiency of at least level B1 (CEFR)

There is **no tuition fee**. A semester fee of approx. 90 Euro has to be paid upon enrollment. Students must cover their living costs and, if applicable, provide the necessary financial proof to obtain a student visa. Students from partner universities should inquire after scholarship opportunities and nomination procedures with their coordinators.
