2023 YOUNG SCIENTIST

Conference | 29 March, 2023

The 20th annual conference of young scientists **“YOUNG SCIENTIST 2023”** organized by the Vytautas Magnus University Agriculture Academy (VMU AA) will be held on March 29 remotely. The conference is intended for the first, second and third degree students. The purpose of the conference is to involve students in scientific activities, develop the ability to publicize scientific research results, present their scientific research achievements and discuss topical issues of bioeconomy, green course, climate change, ecosystem sustainability, rational use and protection of natural resources.

There is no conference fee for students.

Certificates of conference participants will be awarded to the speakers of the conference. Speakers will be able to publish articles in the collection of articles of the conference **“YOUNG SCIENTIST 2023”** or in another scientific publication, for example, in the scientific journals **“Agricultural Sciences”**, **“Agricultural Engineering”** or another, after submitting articles that meet the requirements for articles in a scientific publication.
