

CURRICULUM VITAE – DIMITRIOS KOUTSIANITIS

Dimitrios Koutsianitis (Male) is a research associate and academic fellow at the Department of Forestry, Wood Sciences & Design, School of Technology, University of Thessaly, Greece. He has a Bachelor in Forestry and Natural Environment and an M.Sc. in Harvesting and Technology of Forest Products from the Aristotle University of Thessaloniki. In 2015 he was awarded a PhD from the Aristotle University of Thessaloniki in the field of Wood Structure and Properties. In the period 2016-2017 he conducted postdoctoral research, with a scholarship of excellence of the Research Committee of the Aristotle University of Thessaloniki with the topic "Use of high frequency electromagnetic waves for analysis of growth rings width and density of coniferous and broadleaf species". In the period 2013-2014 he worked as a researcher at the Institute of Wood and Paper Technology, at the University of Western Hungary. He has also gained knowledge and experience from the manufacturing process of wood products and wooden constructions, as he has worked (period 2015-2018) as a production manager in a Greek wood manufacturing company.

He has participated in national and european research projects related to the improvement of wood properties, the production of alternative composite wood products, the quality control of wood and the utilization of biomass residues.

He teaches courses (as an academic fellow and as a lecturer PD 407/80) at the University of Thessaly, the Aristotle University of Thessaloniki and the Agricultural University of Athens, in the subjects of wood structure and properties, wood technology and wood quality.

He has published and continues to publish in journals with a high impact on the scientific community. His research interests relate to new technologies in wood science, techniques for improving the properties of wood, quality classification of wood, utilization of biomass residues and the development of innovative wood products.

Awards / Achievements / Grants

- Scholarship of excellence obtained from the Research Committee of the Aristotle University of Thessaloniki for conducting Post-doctoral research (period 2016-2017) in the field of Wood Science, with the topic "Use of high frequency electromagnetic waves for analysis of growth rings width and density of coniferous and broadleaf species".
- Grant obtained from the European Forest Institute (EFI) for completion of the Winter and Summer School 2013 (WSS 2013) with title "Making values work - sustaining multiple values in managed forests", held in Belin-Beliet, France (17-23 March 2103) and Pichl, Austria (30 September - 4 October 2013).
- Scholarship obtained from the Greek State Scholarship Foundation (IKY) for conducting Postgraduate studies (18 months, Jan 2008 – June 2009) in the Faculty of Forestry and Natural Environment, Aristotle University of Thessaloniki.
